

Care and Maintenance Guide

alumiLAST® Railings, Deck Frames and Decking

Railing & Deck Frames

CLEANING

- A. Dirt and Debris – To remove dirt and debris, use clean water and soap, rinse with water. Do NOT use acid solutions, steel wool, or other harsh abrasives.

MAINTENANCE

- A. Periodically check for any loose parts, such as screws or railing pickets.
- B. If chips or scratches are found in the powder coat surface, use a similar color enamel touch up paint (either spray or liquid).

Decking

CLEANING

- A. Dirt and Debris – Clean deck to remove dirt and debris. Soap and water is generally all that is needed. An eco-friendly cleaner called Citadel's Eco Cleaner is also available directly from Citadel Coatings. Phone 866-765-4310 or www.citadelfloors.com. Do NOT use acid solutions, bleach, steel wool, or other harsh abrasives.
- B. Ice and Snow – Use a plastic shovel, NOT a metal shovel to remove ice and snow. Apply calcium chloride to melt ice. Rinse off debris when first practical.
- C. Oil & Grease Stains - Rinse the stain with hot water as soon as possible.
- D. Mold & Mildew – Semi-annual (spring and fall) cleaning of the deck is important to prevent the buildup of pollen and other debris that can support the growth of mold.

MAINTENANCE

- A. If chips or scratches are found in the powder coat surface, use a similar color enamel touch up paint (either spray or liquid).
