Bethel Lutheran Nursing & Rehabilitation Center Williston, N.D.

Since welcoming its first resident in 1951, Bethel Lutheran Nursing and Rehabilitation Center has now grown to one of the largest nursing facilities in North Dakota.

From left: Kevin Siroshon, Project Specialist, and Laundry Staff Cathy Steen, Joyce Arther, Betty Jo Falcon and Verna Nicks.

Proud of its guiding mission to provide Christian care in its truest meaning-ministering to the physical, spiritual and emotional needs of each person, Bethel Lutheran offers the full continuum of care services from independent living apartments to skilled nursing and memory care.

Bethel Lutheran has a large and well run laundry operation with great and dedicated long term staff with up to 43 years tenure. In 2017 Bethel Lutheran replaced two of their Milnor washers with new Milnor 36026V&Z MiITouch 100# machines along with two 75#Huebsch dryers with moisture sensing all from MCC.

A dedicated new maximum speed version of America's most popular small piece folder series that performs French or 1/2 folds on a variety of items

High-Production Small Piece Folder

Chicago introduces the best of both worlds – a new Air Chicago Series model with all the quality, reliability and accuracy of the original Air Chicago in a more streamlined format designed for laundries requiring high speed folding of items up to 35" (854mm) wide, including towels, gowns, pads, and a variety of other items. Narrow footprint saves space and allows one or multiple units to be installed in commercial or on-premise laundries with limited floorspace. For the first time, laundries can replace older design mechanical, less accurate towel folders with Air Chicago quality in the same footprint – while adding the industry leading accuracy of Chicago's patented air pulse folding and state-of-the-art CHI-Touch touchscreen operating, management, and diagnostic control. All backed by Chicago's factory and service support team who have helped make the Air Chicago series the most popular small piece folders in the market for over fifteen years.

Fugitive Lint Has Nowhere to Hide.

Introducing the SA-S1 Fan by SonicAire:

- Prevents overhead lint accumulation
- Reduces overhead cleaning costs
- Greater fan velocity and reach than the original SA 1.0
- Increased effective cleaning radius (by as much as +35%)

MCC Service Department

MCC Service Manager Ed Jensen recently successfully completed a very rigorous course of study from Alliance Laundry Systems and achieved the status of Senior Certified Technician! Ed is now in the process of mentoring the other MCC service technicians in this training pursuit in order to assure the finest of service to all of our customers who operate all brands of Alliance Laundry machinery.

Athletic Laundries

High School, Collegiate & Professional Sports – A winning team image

Athletic laundries must be assured that they are providing sanitary towels, uniforms and work out wear. Minnesota Chemical offers the perfect combination of washers, dryers and chemicals to assure clean towels and athletic wear every time. Specialty spotting products and processes allow for the removal of stubborn grass and tape stains. We also feature an array of uniform marking items for team and individual identification. Laundry carts, baskets, bags and nets complete our offerings for the athletic laundry. Athletic facilities process many types of laundry and need heavy duty stain and odor removal and Minnesota Chemical can bring that to you, let us provide you our best solution.

WANTED: SERVICE TECH TRAINEE

Basic electrical knowhow or better • Interested in learning new skills

Good driving record • Some overnight travel • Can do attitude

Call Ed Jensen - Service Manager at 651-646-7521

Service Tips By Ed

Do you know what the main cause of dryer fires is? That's right, excessive lint buildup. Let's talk about what maintenance you should be doing to your dryers daily, monthly and yearly to prevent fires.

Daily: Clean the lint screens twice per 8 hours of operation and inspect the screens for any rips or tears and replace if necessary.

Monthly: Vacuum off the dry burner compartment, belts and pulleys. Pull the lint screen and clean the fan blades. With the dryer running use compressed air to blow out the vents on the motors thus preventing overheating and premature failure.

Yearly: Use an outside contractor to inspect and clean all dryer venting to ensure proper air flow for optimum operation.

Remember to always properly turn off all power to the dryer when performing routine maintenance.
