The TRANSOM ADAPTER allows the user to remove the outboard motor bracket along with outboard motor from transom of boat while not in use.

1. Mounting position of Transom Adapter must be exactly in the same position as described by manufacturer of the outboard motor bracket. For installation of bracket see Owner's Manual for 55-0010, 0012,0021,0022.
2. When position of the Transom Adaptor has been determined, drill (4) four 11/32" holes through transom, using the Transom Adaptor as template.
3. Place the Transom Adaptor over bolts (stainless steel) first, then through The Transom Adaptor. Locking device will be on left of adaptor facing transom.
4. Attach washers and nuts to supplied SS carriage bolts and tighten securely.
5. Slide the Outboard Motor Bracket down into the adaptor.
6. To theft-proof equipment, DROP-PIN, PADLOCK, CHAIN OR CABLE Locking devices can be used to secure the bracket to the adaptor through the locking hole.

Note: For existing installation, remove the outboard motor bracket from the transom of the boat, center the Transom Adaptor over the former Bracket position and proceed as described Under #2 above. REPAIR HOLES FORMERLY USED BY **BRACKET**.

**IMPORTANT: When trailering boat, remove motor from the Bracket.**
