55-0045 Auxiliary Hydraulic Motor Lift

For clamp-on auxiliary motors up to 40HP and 250 lbs.

With an impressive 15.5" of vertical lift, the Model 45 is perfect for boats where a big [up to 40 HP] kicker motor will be mounted to a tall transom. Rugged construction features 1/4" thick fabricated aluminum plates, heavy-duty black powder coat paint, and stainless steel hardware.

This Electro/Hydraulic system includes all wiring (25 feet), re-lays, and a dash mounted rocker switch shown here.

To provide adequate support for your Panther bracket, the transom side of the bracket must be 100% covered by the boat's transom.

For control anywhere in your boat, consider the optional wireless mote shown here, MarineTech part number 55-0105

re-

Weight 42 lbs.

Transom Plate Dimensions

Height 13 inches
[33.02 cm]

Width 12 1/4 inches
[31.12 cm]

Motor Plate Dimensions

Height 15 1/2 inches
[39.37 cm]

Width 12 1/4
[31.12 cm]

Weight 42 lbs.

When in the fully raised position, the top of the motor plate is about 17" higher than the transom plate. When in the fully lowered position, the top of the motor plate is about 2" higher than the transom plate.
