55-2700

Trolling Motor Tie Bar Kit

Extremely heavy duty, the Panther Trolling Motor Tie Bar Kit connects an auxiliary trolling motor to a main motor with hydraulic steering. Steer your kicker motor from the helm along with your big motor.

The bar is 36" long [91.44 cm] with a diameter of 1/2" [1.27 cm] and comes with the drive bracket that attaches to the most common hydraulic steering systems.

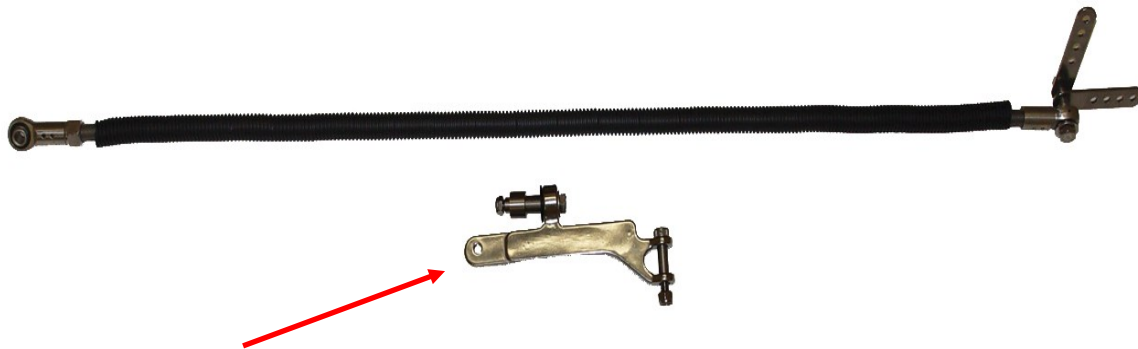

The rod is fully threaded so it can be cut for custom installations. Composed entirely of stainless steel.

55-2750

Drive Bracket

The Panther Drive Bracket is composed of stainless steel, and is the same bracket that is included with the Panther Model 55-2700 Trolling Motor Tie Bar Kit.

Model 55-2400/55-2600 can be used in place of the 55-2700 with this drive bracket. The bracket attaches directly to the most common hydraulic steering units for a professional installation.

This is the drive 2750 bracket, it is included with the 2700, or can be purchased separately.
