55-9035

3 inch Spacer Kit for Model 55-0035/55-0435

Made out of 713 cast aluminum, this spacer provides an extra three inches of setback for the Model 35.

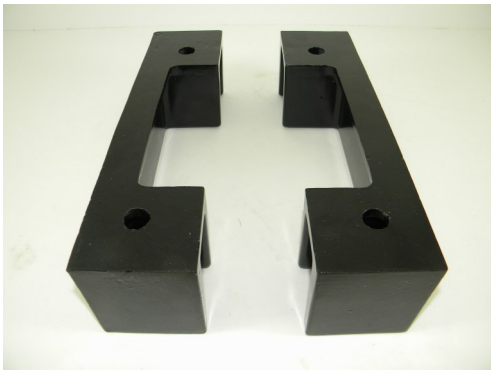

I/O, jet drive, offshore, sailing, and other boat owners can now enjoy the convenience of hands-free kicker lifting. Impossible installations are a thing of the past.

The spacer will extend the Model 35 to 16" of setback allowing your kicker motor to tilt fully without the motor cover hitting the transom. Chromate dipped and black powder paint coated for maintenance free durability.

Dimensions: Each piece, 11 1/4" x 3" x 2 3/4".

Product weight: 8 lbs. Support weight: 150 lbs.

Hole spacing: Down 8.250" between holes.
