Red Oak High School students and parents can learn about dual enrollment offerings, including those from Texas State Technical College in North Texas, this week at two special information meetings.

The Red Oak Independent School District will host Dual Credit/Advanced Placement Parents Night meetings at 6:30 p.m. on Tuesday, Jan. 24 and Thursday, Jan. 26 at the high school at 220 Texas Highway 342 in Red Oak.

"In Red Oak, we are committed to preparing students for the world they will enter after graduation," said Brenda Flowers, Red Oak's deputy superintendent and chief academic officer. "Dual credit and college programs can prepare the students to go straight into a college or go into a career."

Students who will be sophomores, juniors and seniors in the 2017-18 academic year can take dual credit classes in Automotive Maintenance and Light Repair and Visual Communications Technology - Design Specialization Technology. Students can also take classes in programs that TSTC in North Texas offers: Computer Aided Drafting and Design Technology; Computer Networking and Systems Administration; Heating Ventilation and Air Conditioning Technology and Welding Technology.

"Some of these programs will be taught by credentialed instructors at the high school and for some programs, the students will come to TSTC for on-site instruction," said Kori Bowen, interim director of dual enrollment at TSTC.

Flowers said flexible scheduling between the high school and TSTC enables students to walk to and from the campuses to take classes.

"It is a very unique partnership because very few school districts in the state have a full college campus adjacent," Flowers said.
Career and technical courses are a school-wide effort. The high school has about 1,800 students in grades 9 to 12.

"As part of our graduation plan, everyone takes a career and technical class," Flowers said.

Red Oak High School students will begin advising and registering for next year's classes in February.

For more information on TSTC, go to tsc.edu.
